

Oracle PPM Consultant/Engineer

Location: Remote/Reading/Newbury/London/Dusseldorf

Salary: £32,500 to £45,000 GBP

Job Type: Permanent

About the job

Role Requirements

On a daily basis, this role:

Billing, Project Control, Project Financials, and Grants for Public Sector, Education, and Non-Profit clients. Responsible for end-to-end implementations, managing both onshore and offshore teams. Collaborate closely with adjacent modules such as Financials, Procurement, HCM, and Project-Based Supply Chain Management. Build trusted relationships with stakeholders by aligning technology solutions with mission-driven goals, compliance standards, and funding regulations. Play a key role in developing internal Oracle Cloud PPM and Grants capabilities and contribute to pre-sales and bid activities tailored to sector-specific regulatory frameworks.

Required Technical and Professional Expertise:

Proven experience delivering at least 2 Oracle Cloud Projects and/or Grants implementations within Public Sector, Higher Education, or Non-Profit environments.

Deep understanding of sector-specific compliance, funding sources (e.g., federal, research, donor), and statutory reporting requirements.

Full project lifecycle expertise: requirements gathering, fit-gap analysis, functional design, configuration, UAT, training, deployment, and post-go-live support.

Hands-on experience with key Oracle Fusion Cloud PPM modules:

Project Costing

Project Billing

Grants Management

Project Contracts

Project Control

Demonstrated knowledge of fund tracking, indirect cost allocation, and compliance reporting under frameworks such as Uniform Guidance (UG) or Higher Education Act (HEA).

Proven track record in leading cross-functional teams, with experience managing a global delivery model involving both onshore and offshore resources.

Strong client-facing skills and the ability to effectively communicate with executives, functional users, and technical teams.
